

FIG. 1

FIG. 1

A technical drawing of a mechanical assembly, likely a valve or actuator, shown in a cross-sectional view. The drawing includes several numbered callouts (1 through 20) pointing to various components. The assembly consists of a main body (1) with a large rectangular section (12) on the right. A central shaft (3) passes through the body, with a seal or gasket (2) at the top. A lever arm (4) is attached to the shaft, and a handle (5) is at the top. A spring (6) is shown at the top left, and a piston or plunger (7) is at the bottom left. A small component (8) is at the top right, and a small component (9) is at the bottom right. A small component (10) is at the top center, and a small component (11) is at the bottom center. A small component (13) is at the top right, and a small component (14) is at the bottom right. A small component (15) is at the top center, and a small component (16) is at the bottom center. A small component (17) is at the top right, and a small component (18) is at the bottom right. A small component (19) is at the top center, and a small component (20) is at the bottom center.

A technical line drawing of a mechanical assembly, likely a pump or valve mechanism. The drawing includes several numbered callouts: 1 points to a large, rounded rectangular component; 2 points to a small, shaded rectangular component; 3 points to a long, angled rod or shaft; 4 points to a small, rectangular component; 5 points to a horizontal rod or shaft; 6 points to a vertical rod or shaft; 7 points to a vertical rod or shaft; 8 points to a small, rectangular component; 9 points to a small, rectangular component; 10 points to a small, rectangular component; 11 points to a small, rectangular component; 12 points to a small, rectangular component. The drawing is a black and white line drawing with no shading or texture.
